

ULTRA GRIP MATS

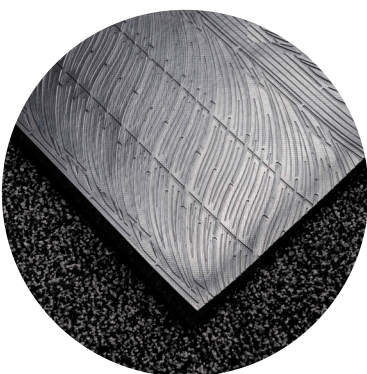

A MAT THAT STAYS IN PLACE LIKE NEVER BEFORE

AlSCO has taken inspiration for the newly developed **Traction** mat from the tread on a car tyre. Understanding what incredible traction this pattern supplies a vehicle on the road, the new **Traction** backing grips to the floor just like car tyres do to the road. It's truly a great new innovation in mat technology.

Not only does our new **Traction** mat grip well, it also uses our most innovative top pile, Phoenix, that collects significantly more dirt and water than a standard mat. Our Phoenix top pile fibre can hold an incredible 6kg of dirt and 3 litres of water. Its fibres even trap small dirt particles while providing the added benefit of super quick drying meaning no more soggy mats on wet days.

The Traction mat scored the highest ever rating recorded by the National Floor Safety Institute for a carpeted mat.
