Clean Room Garment Rental Services

Cleanroom Coverall

6727

PE

Combined with the appropriate cleanroom clothing – head and shoe coverings, the coverall provides maximum body coverage.

They are typically processed to Class B standard, and can be sterilised via CRG's ethylene oxide sterilisers. Class D processing is also available for Class I and II Medical Device applications.

Coveralls come standard with nylon zip.

Ideal for

Grade A in B (Class 100 / ISO 5) Aseptic Filling & compounding (Sterile) and Microtesting
Grade C (Class 10,000 / ISO 8) Class III medical device and other industrial application

Cleanroom Barrier Coverall with Hood

6731

Ultrashield

CRG'S barrier fabrics protect operators from potentially harmful powders and solutions. When processed using CRG's proprietary PCG (Potentially Contaminated Garments) wash, Ultrashield Fabric (US) and Integrity (IN) coveralls offer fluid repellency. This makes them ideal for wet environment applications.

When being used to protect against hazardous drugs, it is critical that the customer liaises with CRG to ensure that each drug has been validated for removal by PCG processing.

Ideal for

Grade A in B (Class 100 / ISO 5) Aseptic filling & compounding of: Hormones, Antibiotics and Antineoplastics

Cleanroom Smock

6426

PE / Ultrashield

The labcoat style design of the smock is ideal clothing for less critical cleanroom applications.

CRG's Ultrashield barrier fabric protects operators from potentially harmful powders and solutions. When processed using CRG's proprietary PCG (Potentially Contaminated Garments) wash, UltrashieldFabric (US) coveralls offer fluid repellency. This makes them ideal for wet environment applications.

Ideal for

Controlled environments (Ungraded) High risk food processing facilities

Facility Pant

6423

Ultrashield

Our facility garments have been specifically developed for controlled manufacturing environments that are less critical than traditional cleanroom manufacturing areas. All garments are processed to a guaranteed low bioburden level in our specialised bioclean facility. Our aim is to minimise the chance of bacterial contamination on every garment, every time.

Ideal for

Controlled environments (Ungraded) High risk food processing facilities, Tableting, creams, solutions, powders and Primary and secondary packaging

Facility Top

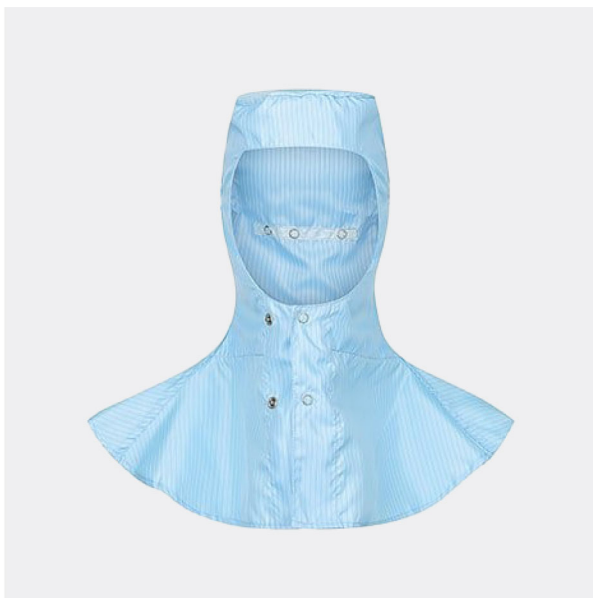

6425

Ultrashield

Our facility garments have been specifically developed for controlled manufacturing environments that are less critical than traditional cleanroom manufacturing areas. All garments are processed to a guaranteed low bioburden level in our specialised bioclean facility. Our aim is to minimise the chance of bacterial contamination on every garment, every time.

Ideal for
